Łukasz Łyskawa

I am an engineer specialized in mobile systems and applications.

Currently, I am employed as an Android Developer. Supporting and developing Rossmann Fotowelt & PrintCube apps is my daily job at the company. If you would like some extra insight into my responsibilities or tasks, please visit my LinkedIn page, or my portfolio where I elaborate more about the apps.

I worked as an intern at Whalla Labs, where I created a Windows Phone version of an Android application called „Magic Square Rush" and had the opportunity to work with and learn from great specialists.

Kotlin, C# and Java are my preferred programming languages, however I keep an open mind about new and upcoming technologies and SDKs.

Work experience and internships

Since 05.2016

di suport pl Sp. z o.o.

Junior Android Developer / Regular since 01.2018

07.2015
